

JAMES FISCHER

University of Washington Undergrad

I am James Fischer, a driven and adaptable college senior finishing a dual degree in both Computer Science and Business Administration at the University of Washington. With hands-on experience in both software engineering and business development, I'm actively seeking opportunities in tech or business sectors where I can contribute technical insight, operational efficiency, customer-focused innovation, and more. I look forward to bringing a unique blend of technical proficiency, entrepreneurial initiative, and strategic thinking, and ultimately to being a valuable asset to whichever company I work for.

EMPLOYMENT HISTORY

IT OPERATIONS MANAGER

Jun 2026 – Present

Seattle Digital Marketing

- Administer and troubleshoot Linux-based business infrastructure, including CentOS virtual machines operating within VMware ESXi and vSphere environments.
- Diagnose VM startup, filesystem, browser, networking, and application issues through SSH and command-line tools, restoring systems used for day-to-day business operations.
- Support a large virtual-machine environment containing dozens of remotely accessed CentOS systems, including VM registration, maintenance, software updates, and configuration.
- Manage DNS and domain infrastructure across a large company-owned domain portfolio using platforms including eNom, Cloudflare, and CloudPanel.
- Automated DNS record deployment for a 25-domain ownership-verification project, adding required TXT records while preserving existing production DNS configurations.
- Audit hosted website source files using Linux command-line tools to locate embedded forms, scripts, and submission endpoints across multiple domains.
- Reconfigured website lead-routing workflows so customer inquiries are delivered directly to designated business email accounts.
- Administer and troubleshoot Google Workspace accounts, Gmail configurations, business email routing, account access, and recovery processes.
- Diagnose infrastructure issues involving Synology NAS storage, virtual machines, filesystems, web services, and remote-access environments.
- Develop scripts and repeatable command-line procedures to reduce repetitive administration across multiple systems.
- Assist with CRM, domain-sales operations, technical account management, and other business technology initiatives.

SALES SUPERVISOR

Jul 2025 – Jun 2026

Casper

Bellevue, Washington
